Assignment 05_Problem #4: Optional Bonus - Testing, Testing...

A. Special Numbers

Input	Expected output	Why?
-11	Invalid, try again! Tell me your number:	number < 0, the program needs positive number to proceed, so it asks the user again
2	Your number is even!	2 is an even number ($2 \% 2 == 0$) 2 is not divisible by 4 or 5.
4	Your number is even! Cool!	4 is an even number ($4 \% 2 == 0$) 4 is divisible by 4 ($4 \% 4 == 0$) 4 is not divisible by 5.
10	Your number is even! Wow!	10 is an even number ($10 \% 2 == 0$) 10 is not divisible by 4. 10 is divisible by 5 ($10 \% 5 == 0$).
0	Your number is even! Cool! Wow!	0 is an even number ($0 \% 2 == 0$) 0 is divisible by 4 ($0 \% 4 == 0$) 0 is divisible by 5 ($0 \% 5 == 0$)
1	Your number is odd!	$1 \% 2 = 1$, so it is not an even number. The if statement is not satisfied and 1 is an odd number. 1 is not divisible by 5 because $1 \% 5 == 1$
15	Your number is odd! Great!	$15 \% 2 = 1$, so it is not an even number. The if statement is not satisfied and 15 is an odd number. 15 is divisible by 5 ($15 \% 5 == 0$).

B. Two Dice

Input		Expected output	Why?
Dice 1	Dice 2		
2	6	Evens!	Both dice are even. (Remainder is 0 when divided by 2.)
1	3	Odds!	Both dice are odd. (Remainder is 1 when divided by 2.)
2	4	Evens! Sums!	Both dice are even. (Remainder is 0 when divided by 2.)

			2 + 4 = 6, sum of two dice equals sum of roll.
1	5	Odds! Sums!	Both dice are odd. (Remainder is 1 when divided by 2.) 1 + 5 = 6, sum of two dice equals sum of roll.
1	6	High/Low roll!	One die is 1 (the lowest roll) and the other is 6 (the highest roll).
1	9	Invalid, try again! What was your second roll?	Dice 2 is 9 and 9 is not between 1 and 6 so the user needs to enter a new number for Dice 2.
-1		Invalid, try again! What was your first roll?	Dice 1 is -1 and -1 is not between 1 and 6 so the user needs to enter a new number for Dice 1.
1	1	Odds! Snake Eyes!	Both dice are odd. (Remainder is 1 when divided by 2.) Both equal to 1.
